Gym
Gaming

PROFILE

Third-year game development student at Howest, focused on C++ gameplay programming. Currently building The Final Sigil in Unreal Engine with a team of 6. Looking for an internship from February to June 2027.

PROJECTS

The Final Sigil - C++, Unreal Engine · Team of 6 · In production
Top-down bullet-hell roguelike with a modular spell-crafting system and dynamic spell casting.

- Built the spell crafting system
- itch.io page

Game AI Research: Wave Function Collapse - C#, Unity · Solo research project
Analyzed the Wave Function Collapse algorithm and explained its core propagation mechanics.

- Benchmarked execution times across varying map sizes and compared the cost of extra features (weighted tiles, negative constraints).
- GitHub repo

SKILLS

Languages: C++, C#, Lua.

Engines: Unreal, Unity, custom SDL/OpenGL.

Tools: AutoHotkey, GitHub, Perforce, HackNPlan

PROFESSIONAL EXPERIENCES

Indaver
Job Student
01/08/2024 - 31/08/2024 | Doel, Belgium
